Art Unit: 2852

1. This application is in condition for allowance except for the following formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

#### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “90” has been used to designate both an intermediate transfer unit (figure 3) and a nozzle (figures 4 and 8). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Allowable Subject Matter***

3. Claims 1 and 3-9 are allowed.

***Response to Arguments***

4. Applicant's arguments filed 5/10/05 have been fully considered but they are not persuasive.
5. Applicant argues that none of the figures show the reference numeral "90" designating both a nozzle and an intermediate transfer unit. However, this is incorrect. In figure 3, the reference numeral "90" appears with an arrow pointing toward an intermediate transfer unit; and in figure 4, the reference numeral "90" appears with an arrow pointing towards a nozzle and in figure 8, the reference numeral "90" appears with a lead line to a nozzle. Therefore, the drawings filed 10/21/03 are objected to. (Note, the replacement sheet for figure 1 filed 5/10/05 is acceptable for that figure).

The attached sheet of a drawing includes a change to Fig. 1. The sheet, which includes Fig. 1, replaces the original sheet including Fig. 1. More specifically, the reference numeral "27" pointing to a roller of a fixing unit 25 is deleted to be consistent with the paragraph [0033] of the specification.
